DETAILED ACTION

The following is an examiner's statement of reasons for allowance: no prior art teaches or fairly teaches a monoclonal antibody having specific affinity for (i) a complex of serine proteinase and serine proteinase inhibitor, (ii) a cleaved and uncomplexed form of serine inhibitor, while having no specific affinity for the proteinase inhibitor in its uncleaved and active form. The closest prior art is the reference of Laurell et al. (Thrombosis and Haemostasis (1988) Vol. 60: pages 334-339). Laurell et al. teach an antibody (M11-15) can bind to the complex of serine proteinase with proteinase inhibitor and uncleaved active serine proteinase inhibitor (See Figure 8, both upper and lower part, lane 6)(emphasis added). However, the antibody does not have affinity to the cleaved and uncomplexed form of proteinase inhibitor.

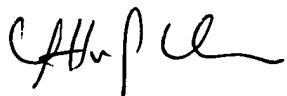

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
